Professional Summary

Full-Stack Developer and Product Support Engineer Intern with experience in Toll Management Systems (TMS), back-end development, and AI-driven applications. Skilled in SQL databases, system troubleshooting, networking, and building scalable web applications using MERN stack. Strong understanding of system architecture, API integration, and production-level issue resolution.

Skills / Technologies

Languages: JavaScript, HTML, CSS

Frontend: React.js, Tailwind CSS, Vite

Backend: Node.js, Express.js, .NET

Databases: SQL Server, MongoDB, Oracle

Systems: Windows Server, Linux (Basics), Networking

APIs: REST API Development, API Integration

Tools: GitHub, VS Code, Postman

AI/Data: ANPR Dataset Preparation, Data Cleaning, Annotation

Core: Technical Support, Troubleshooting, Debugging, System Reliability

Experience

Product Support Engineer Intern

Vara, Kolkata

March 2026 – Present

- Provided technical support for Toll Management Systems (TMS), improving system uptime and reliability.
- Diagnosed and resolved production issues across application, database, and network layers.
- Managed SQL databases and supported system deployments and updates.
- Troubleshooted networking and connectivity issues in live environments.
- Worked with enterprise systems built on .NET and backend infrastructure.
- Prepared and validated datasets for ANPR systems ensuring data accuracy.
- Documented recurring issues and implemented faster resolution strategies.

Frontend Developer Intern

Edunet Foundation (AICTE)

Aug 2025 – Sept 2025

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Built UI components following modern UI/UX principles.
- Collaborated on project-based development using GitHub.
- Strengthened debugging and problem-solving skills through practical assignments.

Projects

AI Resume Checker (Full Stack + AI)

GitHub Repository

- Developed an AI-powered resume analysis system to evaluate resumes against job descriptions.
- Implemented resume parsing, keyword extraction, and ATS-based scoring logic.
- Built REST APIs using Node.js and Express for processing resume data.
- Integrated MongoDB for storing resumes and analysis results.
- Designed feedback system for skill gap analysis and improvement suggestions.
- Implemented file upload handling for resume processing (PDF/DOCX).

Personal Portfolio Website

- Built a responsive portfolio using HTML, CSS, and JavaScript.
- Showcases technical projects, skills, and contact information.

Education

Bachelor of Computer Applications (BCA)

JIS College of Engineering, Kalyani

Aug 2023 – June 2026

Additional Information

- Strong interest in Backend Development, DevOps, and AI Systems
- Experience in enterprise systems and modern web technologies
- Quick learner with strong analytical and problem-solving skills
